Office Action Summary	Application No. 10/699,001	Applicant(s) GOLDIN, FIMA	
	Examiner Jason J. Boeckmann	Art Unit 3752	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 4-6, 10 and 12-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/25/2005.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 2, two opposite surfaces of the disk are claimed and in line 5 one of those surfaces is being referred to. If that is the case it is not clear as to which surface is being referred to with the word "another " in line 6. In addition, it is unclear to the examiner what edge is being referred to in line 8 of claim 1. It appears that the disk has two edges on for each surface.

Claims 8 and 9 recite the limitation "said projections" in line 2. There is insufficient antecedent basis for this limitation in the claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7-9 and 11 are rejected, as well as understood, under 35 U.S.C. 102(b) as being anticipated by Tsuzuki et al (JP 05-256415).

Tsuzuki et al shows a rotary disc atomizer comprising a disc (9) having an axis and being rotatable about the axis. The disc having two opposite surfaces (figure 3) in an axial direction and a peripheral edge (9a). The disc also including a plurality of circular through holes (9b) that allow the fluid to flow from one surface to the other. Regarding claim 2, the thoroughgoing holes are arranged in a circle having a predetermined radius. Regarding claim 11, the disc body is circular (figure 3).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Berner et al (US 2003/0146309) shows a disk with a plurality of through holes. Lohkamp (6,550,693) shows an atomizer comprising a disk with a plurality of holes.
